## NEWS: New releases 27/10/2008

Click on any title to buy the album.

### Living Colour: CBGB OMFUG Masters: August 19 2005 *CBGB Records*

This live set captures Living Colour about a month after I saw them at the Metro in Melbourne, as the band toured off the back of its reunion album, *Collidescope*. This set features a few songs from that album as well as a lot of classic material, mainly drawn from the first two albums, which honks me off slightly because my favourite LC CD is 'Stain,' which is only represented by 'Ignorance Is Bliss' here.

### Megadeth - Rust in Peace (Vinyl reissue) *Capitol*

Another one of those 'if you don't have this, you can't call yourself metal' albums, *Rust In Peace* features the Megadeth debut of Marty Friedman, fresh from *Cacophony* and eager to fill every available corner of this album with exotic phrasing and unusual melodies.

### Cradle of Filth - GodsPEED On The Devil's Thunder (Special Edition 2 CD)

*Roadrunner*

This is a concept album telling the story of Gilles De Rais, the world's first serial killer and a good buddy of Joan of Arc. This one's being hailed as the band's most 'aggressive and chilling' album to date, and is a must for anyone who spends as much on white facepaint as I do on lattes.

### Exodus - Let There Be Blood *Megaforce*

Thrash pioneers Exodus rerecord their classic *Bonded By Blood* with their new line-up, to bring the album's sound up to date with their later recordings, and with a slightly less terrible cover. Produced by Exodus's Gary Holt and mixed by can-he-do-no-wrong producer Andy Sneap.

### Steve Vai - Passion and Warfare (Vinyl reissue) *Sony Legacy*

What is it with vinyl reissues? Not that I'm complaining, cos here's another one I never had the chance to buy on vinyl when it was first released, and there's a good chance I'll probably buy this just for the sentimental value - I really wanted this on vinyl when it first came out (I was 12) and had to settle for the tape. Anyway, another classic of the genre, if you've never heard it you suck, etc etc etc.

### The Cure - 4:13 Dream *Geffen*

The 13th album by The Cure, rearranged from the original plan to release a double album. This one contains the 'light' tracks, and the dark moody stuff will be released at a later date. The Cure is now down to just four members - Robert Smith, Simon Gallup, Porl Thompson and Jason Cooper - and this album is suitably stripped back.
