LIVING COLOUR/CBGB OMFUG Masters: August 19, 2005 The Bowery Collection
(MVD

Audio) 12 tunes are presented here in awesome sounding live disc. This was sort of a reunion type of thing from what I remember and the band just rip through the tunes. From Glamour Man to of course the Cult of Personality, you get the band whipping it up on stage. This band was very original back in the day as they mixed in rock, metal, and some funk into their brand of music and they sounded great back then and they sound great on this disc. The live sound on this is godly and the band are sadly missed, but here is something I can remember them by. Well, worth getting and a testament to have really good the band was in the history of music. Info:
