I just came across this nice little clip of the forthcoming **Bob Mould** live DVD, *Circle of Friends*. It's being released by Trixie DVD, who have also released the Burn to Shine series. Two years in the making, it features a show performed at the 9:30 Club in October 2005, during which Bob played songs spanning his entire career for the first time in a solo setting with a full band. He was backed by Brendan Canty (Fugazi), Jason Narducy (Verbow, Robert Pollard) and Rich Morel (Bob's partner in Blowoff). You can get some more details about the show and view the clip [here](#). The clip features most of Sugar's "A Good Idea" and the audio sounds incredible. Yet another October release I can't wait for.

Word came out this week that **Robert Pollard** will be releasing two (yes, *two*) new albums, *Standard Gargoyle Decisions* and *Coast to Coast Carpet of Love* on Merge in the traditional Bob/GbV release month of October (October 9th, to be exact).

"We made the decision to break it down into two records, one being the pretty pop record and one being the abrasive punk record, although it's got some pretty moments also. It's almost like Guided By Voices; it's the angel on one shoulder and the devil on the other."
