BERNIE WORELL

Stranger on Earth

Cool docu about one of the great, insane(?) musical geniuses of our time. Like Mozart, he started off impressively with the classics while still a kid. From there, he wound up in Funkadelic. Quite a career trajectory? Along the way, he's made every stop imaginable and touched almost every kind of music imaginable, often leaving quite a foot print behind. Quite a way to spend two hours getting to know the man behind the music, much of it you've loved.

- Chris Spector
