

Always ready to learn more about the Fab Four, I was interested in giving a spin to *The Beatles: Destination Hamburg* (MVD, Not Rated, DVD-\$19.95 SRP) - a new documentary featuring rare footage and interviews chronicling the quartet's formative years in Germany before they found success back in their home country. The DVD also features a 1968 Kenny Everett radio interview with John, Paul, & Ringo, as well as the Tony Sheridan music tracks featuring the young Beatles as backup.
