BLACK METAL SATANICA

Self Titled

(MVD DVD)

by *Chris Forbes*

I was around when this crazy stuff was going on and if you weren't, then have a seat and put this on and your world will be turned into murder, church burnings and Satan. This takes you back to when black metal was first formed, but focuses mostly on the Norway scene where churches were getting burned, people were blowing their brains out and people got stabbed and died. Me I thought some of this stuff was way on the extreme and 2 people are dead and one is still in jail and I am sure he regrets what he did. If he isn't he is even a bigger idiot than I thought. This sent chills down my spine as I can recall all this stuff and it was kinda fascinating going back once again and re living all this crazy stuff.
