JOHNNY GUITAR WATSON

Live In Concert

(MVD Visual)

by *Chris Forbes*

This bored me to tears. This was some bad jazz music. The songs just dragged on and there was no meat, no hooks, no nothing that made me interested in this guy's music. I like some jazz music, but this didn't have anything that appealed to me. The camera work is good and this was recorded back in 1993 at some jazz festival, but to my ears and eyes I didn't hear or see anything of value with this DVD. Info: <http://www.mvdb2b.com>
