Barack Obama: The Power of Change

Barack Obama, Michelle Obama, Oprah Winfrey, Stevie Wonder
The president-elects story is one of humility and undeniable challenge.

It is not often in a lifetime that one can note times of real change in society, culture, politics and ethics all in the space of a night but November the fourth this year saw exactly that when Barack Hussein Obama II was elected to take over as the President of the United States of America. Obvious things to note about the man are that he smokes around seven cigarettes a day, but is cutting down, he only paid off his student loan about four years ago and, oh yes, he is set to become the first ever African-American president.

In a country that only half a century ago refused to give even the most basic of human rights to minorities the promotion of Obama to president in waiting could change ideals and conceptions all over the world. Here in 'The Power of Change' the subject of race runs heavily throughout and is a topic undertaken into great detail through a number of key contributions from Stevie Wonder, Oprah Winfrey, Tyson Beckford and the Rev. Jesse Jackson whose tears were shed upon the announcement of success in the presidential election.

The tale of a man overcoming adversity to ultimate success is a motif that runs through the very heart of what is often referred to as 'the American dream' and Obama is a massive signification of just that. 'The Power of Change' tells the story of a man with intelligence, confidence and the spirit that could well lift a world living in times of power struggle, war and economic meltdown.
