VOIVOD Tatsumaki - Japan 2008 DVD

Rating: 6 stars!

When founding guitarist/founding member Piggy died back about 2 years ago, most people believed that was the end of Voivod...I mean, technically, without Piggy it's NOT the same band, BUT, with Snake still manning the vocals & the same line-up in tact, the band is still out there & I think Piggy would give the band his blessings if he were still with us, because on this new concert dvd you get to see how vital the band still is & the concert footage looks amazing, it sounds great, the new guitarist is good & the bonus section is the real highlight on this dvd simply because there's a cool interview with Dave Grohl where he talks all things Voivod & explains the bands influence on him as a musician, etc., & there's a bonus concert from Canada...technically it's only like 15 minutes worth, but it's a cool bonus, & there's a documentary on the band as well! This dvd is cool as hell, the bands got alot of balls to stick it out after the bands guitarist passed away & it's nice to hear new songs played alongside old Voivod standards on this disc...there's even a Pink Floyd cover that closes the concert portion of the disc out!
