

STREET VOICE NEWS - February 2010

VOIVOD - Tatsumaki DVD

Despite forming in the early 1980s it's taken two decades for Voivod to reach Japan and this recording is taken from a 2008 show recorded for a TV broadcast. The quality is spot on sound wise and visually which will please fans of the band as I've seen some right dodgy releases of Voivod material. There's some right killer tracks on here such as 'Voivod', 'Ravenous Medicine', 'Overreaction', 'Nuclear War' and 'Brain Scan' which sound better then ever as the band just tore through them in true metal style. If having a great show isn't enough for you wait until you see the bonus material which includes an interview with Dave Grohl about Voivod and there's also a 2009 show shot in Quebec city featured. YOu really couldn't ask for a better live DVD with so much quality footage featured on it. Dave Grohl said these words about Voivod 'This is the most bad ass band I ever heard in my life' and that I would totally agree with. 9/10
