Breaking Her Will continues the sordid tradition of offering up female rape and abuse as art. While the film's sleaze factor and questionable morals are never in doubt, it is surprising to see such a high degree of skill wasted on a story that doesn't need to be told. Breaking Her Will is the sickening and reprehensible tale of a loser who kidnaps a chick and tortures the shit out of her, psychologically, sexually, and physically. In short, it's a sick bastard's wet dream.

Director Bill Zebub is definitely pushing the limits with Breaking Her Will. The end result is a film that's tougher to watch than Facts of Life reruns. As a director, Zebub has what it takes to make a good movie, but his choice of subject is definitely in need of work. Zebub's film is pointless misogyny at its worst, and if I ever believed in censorship, Breaking Her Will is a film that I would ban in a heartbeat. But we live in America, and I don't believe in censorship, so the deranged Mr. Zebub has every right to make films like this, for better or worse.

As a director, Zebub knows how to set up a scene. The tension and horror that is put forth in this film are definitely of the highest order. Everything is done so well that most people with weaker stomachs will want to turn the film off after the first fifteen minutes. What Zebub lacks in his film is the element of redemption. Nothing good happens in this movie, and it's merely a test of one's limits, torture for the glee of it. In the end, Breaking Her Will just seems like an excuse to torture some chick on film. While Zebub never crosses the line into the land of hardcore sex and torture, he comes close enough to hinting at it, and the film's main actress, who I truly feel sorry for, spends half of the film naked and tied in a basement while some leering goon visits horrible actions upon her. Bill Zebub's film offers no quarter... and it will receive none from me.

I'm not quite sure who would enjoy this film, but Breaking Her Will is one of the most disgusting things I've seen in a while. It's not that it's necessarily original, a perverted fifteen-year-old could have come up with the plot. It's more the fact that they actually had the stones to go through with it and actually make the film that appalls me. This is the type of shit that gives indie horror and exploitation films a bad name. Even worse, there is no sense of rightness or moral awareness to be found within the film, and this is part of Zebub's

twisted statement about the world. It's a shitty place, and bad shit happens... but we all know that, so does glorifying it for the pervs out there actually amount to anything more than making a cheap buck off of sick fucks? Not really. This film panders to the misogynist, and is not worth the DVD it was put on for a person who actually respects women.

In a certain respect, I admire Zebub his twisted ballsiness. But on the other hand, Breaking Her Will is an abomination of horror cinema. It's like I Spit on Your Grave... only this time the rape and torture scenes last for the whole movie. There's some sort of lame story that's meant to show why this guy is so fucked up, but it does little to make the film worth it.

Final Synopsis: This film is sickening. I guess that was Bill Zebub's point. He's definitely out to push buttons, and is very successful at it. Still, I do not recommend this movie because it does nothing that the average human being will want.

Points Lost: -8 for being what it is
