THE PLOT

What's it all about?

SHARE

The Adventures of Electra Elf is a low budget cable access show about a super-heroine named Electra Elf and her sidekick Fluffer, Fluffer is a Chihuahua who has radioactive pee.

During the day, Electra Elf goes by the name Jennifer Swallows, she is a reporter for ASS (Art Star Scene) magazine. But when danger beckons they get in their leotards and are ready to fight crime.

There's a whole bunch of special guests that appear on the show including (most notably) Taylor Mead and Annie Sprinkle. Others: Mike Amato, Lloyd Floyd, Faceboy, Chuck Funk, Ann Carr and Brenda Bergman.

THE VIDEO

How good does it look?

The show is presented in 4:3 full frame and looks great considering it's very low-budget.

untrained eyes) artefacts . The special effects are awesomely craptastic and are a huge part of what makes the show so fun.

THE AUDIO

How crisp is the sound?

Utilizes a Dolby Digital stereo mix in English, it does the trick but I did notice the sound does varying in places. Quite a few times I had to turn the volume up or lower it a bit. There's lots of music and sound effects which pack a punch, all around a good mix that more than does the job.

THE EXTRAS

Are there any extras?

Extras include a behind the scenes, photo gallery, interview, two extra episodes “Red Letter Day” and “Xmas”. There’s also an insert booklet which has comments about the series by Nick Zedd. The special bonus features are a nice addition, I love extras and there’s an abundance here, so thumbs up to MVD Visual /Nick Zedd on the extras.

FINAL THOUGHTS

Is it worth your hard earned cash?

Wow, what can I say? you'll love it or think it is utterly retarded. It's cute and innocent but highly suggestive, there's retarded voices, bad effects, horrendous acting and insane scripts.

Highly recommended for fans of Nick Zedd. If you've never heard of him then I'd recommend trying to sit through **Geek Maggot Bingo** first.

The Adventures of Electra Elf takes a whole new twist on the "Superhero" genre and has a interesting take on it. It can be taken as complete nonsense, or if you look deeper you might find some commentary within it. I like the fact that it can be taken either way and that this show can appeal to kids and Nick Zedd fans alike.

Presented on 4 discs with a booklet that comes with it, this is a great package and it's not like you can turn on the TV and watch this, it was broadcast on a cable access show and as far as I know this is the only release. There's 20, 28 minute episodes on the 4 discs and this release from MVD Visual is a more than accommodating package for fans of the show and/or Nick Zedd. For everyone else I would suggest that you try and catch an episode on YouTube or check out the official website <http://www.electraelf.com>.
