

Godsend Online

The Killers - "Leaving Las Vegas" DVD - This is nothing more than an straight-ahead cash-in, a shoddy and unauthorized 'biography' stroke-job on a band that, for all intents and purposes, has only released a pair of popular but hardly important pop/rock albums. Much less than a critical or factual biography, this basically amounts to a glorified press kit for this Vegas-based band who found mainstream success with their combination of 80s synthpop and heavier modern rock. Having none of the band's music present on this documentary really hurts, too. Seriously, this one is a waste of time and effort. (Pride DVD c/o MVD Visual)
