

Online punk record label promoting music, selling CDs and merchandise for electronic and punk rock music

DESMOND DEKKER - In Memoriam 1941 - 2006:

This twenty track CD is a compilation of the last recordings undertaken by the famous Ska artist 'Desmond Dekker'. From what I believe these tracks are the first time have been recorded in stereo. How do they compare to the originals? Well the Ska purists may not be convinced in to picking this up but it's interesting to hear how Desmond Dekker has reworked the songs that made him famous. You know songs like '007(Shanty Town)', 'Israelites', 'It Mek' and 'You Can Get It If You Really Want'. They're all here and they all seem to sound so fresh - It's hard to believe on hearing this album that Desmond Dekker wrote all these classic songs years ago! The production is great and captures this great man doing what he does best. Comes neatly packaged with some great sleeve notes and is a fitting tribute to some one who brought so many years of musical pleasure to so many people. (Secret) 9.5/10
