The Velvet Underground is a beautiful enigma. Their infinite influence on music will never cease. "Velvet Underground - Under Review" DVD is an extremely interesting look at the mysterious band. Although Lou Reed is not interviewed, the contributions from critics, friends, and band members are wonderfully insightful. The documentary focuses on each album, the relationship of the band members, and the band's roots. Some of the classic songs featured include "Heroin", "Rock & Roll", "Sweet Jane", "I'm Sticking With You", "After Hours", "Sunday Morning", and "Venus In Furs". Like Dan Treacy of Television Personalities said, "How did the Velvet Underground get that sound?"
