

LED ZEPPELIN

The Origin Of The Species

Sexy Intellectual

3 Stars ***

Led Zeppelin fans will love this documentary. The DVD looks at the formation of the band and dissects the first two records. It's interesting to see and hear the musical backgrounds from which they all came from. The film footage of a 12 year old Jimmy Page rocking out is amazing. It's also interesting to see how much the band borrowed from other bands!
