Radiohead's *OK Computer* Coming to DVD

A new [Radiohead](#) DVD, *OK Computer: Classic Album Under Review*, will be released via [Music Video Distributors](#) and Sexy Intellectual on September 19. The 53-minute film reviews Radiohead's 1997 masterpiece track by track. Contributors include writer/journalist/*Radiohead: A Guide to Their Music* author Mark Paytress, ex-MOJO editor Barney Hoskyns, Radiohead biographer Alex Ogg, and more.

Rare live and studio performances of each *OK Computer* song (and *Pablo Honey*'s "Creep") will be featured in good ol' 5.1 surround sound. In addition, the disc will house "The Hardest Interactive Radiohead Quiz in the World Ever", full contributor biographies, and a "Beyond DVD" section, whatever that means.

Radiohead have wrapped up their extensive North American tour and will break for a bit before making a series of August festival performances.
