Radiohead OK Computer: A Classic Album Under Review

Music Video Distribution

A critical analysis of, arguably, one of the greatest records of all time.

I've got a lot of albums. But I'm 99% sure that 'OK Computer' is the best record I've ever heard. That's a big statement to make but in the 9 years since it's release I've yet to hear a collection of songs that I can connect with as emotionally or an hour of sound that has completely blown me away as this epic from Radiohead. Pity then that this DVD is average at best.

Predictably shot talking heads style with various "authorities" on the Oxford five piece chipping in their opinions on each song, 'OK Computer: A Classic Album Under Review' is a dull watch for fans of this record. Peppared with words such as "disillusion", "paranoia" and "dystopia", the attempts by Barney Hoskyns, Mark Paytress and Alex Ogg to over analyses the likes of 'No Surprises', 'Paranoid Android' and 'Karma Police' become weary and tiresome very quickly. The other problem is that if you're a fan of either Radiohead or just 'OK Computer' you know all this stuff already, you've probably listened to and over analysed this record many, many times.

The extra of 'The Hardest Radiohead Quiz In The World' is bloody hard though; I'm a Radiohead geek and I only got 10 out of 25.
