

THE ROLLING STONES
Under Review 1967-1969 DVD
(MVD Visual)
by Chris Forbes

I am not a huge Rolling Stones fan, but I do like some of their songs and I respect what they have done over the years and the fact that they still have it live amazes me. This DVD takes you back to the bands early days and I really didn't know much about the band, but watching this I learned a few things and some of their early stuff is the best stuff they have put out. You get some live footage and the people they interview know the band well and they trace the early versions of the band. How can you go wrong with: Jumping Jack Flash, Brown Sugar, etc. 90 minutes and if your a Stones fan this is a must get. Info: <http://www.mvdb2b.com>
