MUSE - UNDER REVIEW .

What turns a good band into a great one is usually just the right mix of downright dedication, damned hard work and a special kind of talent which allows for the creation of music that will touch multiple generations. This is certainly the ingredient list which Muse have employed while creating a sound and image that has captured a fan-base larger than that of just about anyone else around at the moment. This film looks at Muse's entire career, and by using rare performance and interview footage of the band, contributions from their closest colleagues and from those who have witnessed and written about their journey, plus seldom seen photos, news reports, scene shoots and a range of other features, creates the finest documentary to date on this extraordinary band, the music they make and the lives they lead, presented in card picture slipcase...IF YOU'RE INTO THIS BAND THEN YOU MUST HAVE THIS VERY GOOD DOCUMENTARY. IT'S A MUST TO HAVE IF YOU'RE A FAN. IT COMES IN FULL FRAME AND STEREO SOUND MIX....BUY THIS AT MUSIC VIDEO DISTRIBUTORS...1-800-888-9202.
