### **FRANK ZAPPA - The Freak-Out List**

(Sexy Intellectual)

Incredibly insightful and thoroughly documented look at the various musical genres that influenced Frank's music. From classical to jazz to rock, Frank drew on an eclectic mix of seeming unrelated artists & styles yet managed to fuse them all into an amalgam of coherent madness rooted in, of all things, a hearty doo-wop base. Even the assortment of pretentious Jicky pricks who weigh in on Frank's genius don't detract from what amounts to a college level musical appreciation class on the Zappa legacy. I give this 88 minute film my highest recommendation. JV
