

## Frank Zappa

### The Freak-Out List

Most rock docs only deal with the subject at hand. This 90-minute offering attempts to paint a portrait of iconoclastic genius Frank Zappa by focusing on his influences, which ranged from the avant-garde classical works of Stravinsky to the down 'n' dirty garage-rock of *Louie Louie*. Featuring plenty of archival footage and interviews, it's a treat for fans. For newbies? Not so much.
