Robert Plant's Blue Note
Sexy Intellectual Prod
rating: 3.5 stars

Robert Plant is widely known for being the lead singer of Led Zepplin and remains in the firmament of rock music for his voice powerful and flexible, able to evoke epic rides among the stars. But this long documentary on DVD (over two and a half hours) allows us to better assess the path Plant has undertaken in his long career. A path that emphasizes its

desire to find new ways, new companions, new adventures.

Robert Plant's Blue Note collects testimonies, videos, thoughts, emotions. And the delivery to posterity to shed light on a rock star who happens to be first of all a passionate artist, able to get back constantly questioning, interested in dealing with new cultures, with reality where he goes back to being a humble artist ready to learn.

Much better to face new challenges that can not reproduce themselves in the same way, in a barren run to recirculate the events that we have moved a thousand years ago. Better a nomadic life than the life of a veteran, this seems to tell Robert Plant (who in 2007 made some peccadillo with the return of Led Zepplin ...) and seems to confirm this DVD (which incidentally was not authorized by Robert Plant and his manager ... just to be clear).
