RATING FOR DOWN IN THE FLOOD

All I really want to do is listen to [Bob Dylan](#) (<http://www.examiner.com/topic/bob-dylan>) for the fourth or fourteenth hundred time. And now we can watch. And listen. In 1966 Bob Dylan began his first electric world tour, a landmark moment, both for Dylan and for the history of rock music, and it bitterly divided his audience. Backing Dylan on stage was an obscure group of Canadian musicians collectively known as The Hawks. In

the months following the tour they would join Dylan during a lengthy convalescence in New York's Catskill Mountains; when both parties re-emerged, Dylan had undergone an artistic transformation that sent ripples across American music and The Hawks had become simply 'The Band', one of the most important recording groups of their generation. **Down in the Flood** (Sexy Intellectual) tells the fascinating story of the relationship between Dylan and The Band, the legendary amateur recordings that they made together in Woodstock, their re-invention of American music and their continued albeit sporadic relationship during the 1970s. Featuring new interviews with many Dylan experts and pros, including Garth Hudson, Band producer John Simon, The Hawks' 66 tour drummer, Mickey Jones (the man who assembled and tutored the Hawks and from whom they took their name) and Ronnie Hawkins, the DVD also features rare footage, archive interviews,

seldom seen photographs and the music that changed the world, all at once making for the finest program on this element of Dylan and The Band's respective and communal careers yet to emerge.
