Anezcephalia - "Kaltwelt" CD

Industrial death noise from Genocide Organ member

German death-industrial project Anezcephalia has been around for 20 years now, but this is my first exposure to them. Centered around Genocide Organ member Michael Keck, this is pure retro-noise, with obvious parallels to early industrial pioneers SPK and Whitehouse.

Tracks like "Frostschrae" wed simple and fuzzy electronic noise nihilism with distorted vocals. It's a morose, oppressive atmosphere that permeates the whole of "Kaltwelt". "Bodies Of Gold" is another bleak, evil celebration of death, disfigurement, and possibly, murder. All the requisite distorted sounds, tape voices, overloaded electronics, and a simplistic semblance of rhythm are here to create a mood of unease and foreboding. Imagine an alternate soundtrack to "Nekromantik", and you wouldn't be too far off. For hardcore death industrial fetishists only, I'm afraid.
