## WOODSTOCK

COMMANDER CODY & His Modern Day Airmen/Live from the Island: A lot of Lost Planet Airmen have gone on make their marks on Americana so why shouldn't the Modern Day Airmen really be the later day members The Band? Did you know Americana could rock? Like this? We thought the recent Emmylou/Rodney Crowell duet set the standard for how to compete with your younger self but to hear these cats rock like this with 40 years of full tilt boogie under their belts leads us to revise the standard once again. Outsider rockers for two generations, there's no dust on this bunch as they rollick through a live 'greatest hits' set that'll have you jumping and hollering for more before you realize you're yelling at a record. Better for getting your blood flowing than Plavix. Hot stuff throughout by pros that know their business and how to get the job done.

- Chris Spector
