SAINT DIABLO blend together elements of metal, hardcore, and latino influence so well, that the end result far exceeds the sum of its individual parts. In the beginning, SAINT DIABLO was compared to bands like ILL NINO and SOULFLY (mostly due to their Latino roots) however, since their recent string of supporting tour slots opening for bands such as SLAYER, DROWNING POOL, DEVIL DRIVER, MUSHROOMHEAD, FEAR FACTORY, and GWAR... it's easy to see that there's much more to this central Virginia quartet than meets the eye. In 2011 alone, the band performed at more than 200 festivals and venues. With the release of this new self-titled album, SAINT DIABLO prove that they are much more than "just another heavy band". Their use of unpredictable melodies and interesting time signatures add a whole new dimension to their legacy, making this their strongest album yet... This is SAINT DIABLO!
