Abundance begins in the mind. Modern success coaches and ancient spiritual teachers agree on that.

That's why Steven Halpern's latest self-help soundtrack combines three proven modalities:

- 1) Truly relaxing music, with a proven and unrivaled track record of over 40 years
- 2) Brainwave entrainment music to gently guide the customer's brain into the precise brain state frequencies that maximize receptivity and amplify intention
- 3) Subliminal affirmations that focus the subconscious mind — the level at which true change occurs!

These statements are not heard audibly, but the *subconscious mind* perceives them—and *responds automatically*!

Plus, the music sounds so good folks would listen even if it weren't good for them!

In addition to Halpern's atmospheric soundscapes, the album concludes with three up-tempo grooves. These tracks encourage the listener to move and exercise, thereby nourishing their body as well as their mind with the positive affirmations.

2. An Attitude of Gratitude	3:53	9. Aligning with Source	7:22
