Palotai, Arguelles, Sciuto - Antiquity CD

Csaba Palotai's sound scratches, rubs, and grates. It can't be domesticated: you let it kindle itself like a wood fire

Plurality of sound, elegance, and modesty, this is the trinity that could define Caba Palotai, a Hungarian, now based in France for more than 20 years. For him, the musician discovers the sounds that he has within him, rather than creating them out of nothing. The lineup with the French saxophonist Sciuto and the British drummer Arguelles could also be described with these three characteristics.

Canine Soldiers

Canine Soldiers explores the intimate bond between Military Working Dogs and combat soldiers on the battlefield.

Military working dog teams have become the most effective agents in detecting explosives and chemical weapons at home and abroad. Their mission is to save lives, not kill. From rigorous training to deployment, the film follows soldier handlers to learn what it takes to become a successful MWD team. Learn how the dogs are bred, how their relationships with their handlers develop, and what it's like for our handler teams to live in interdependence on the war front. Deployed soldiers eat, sleep, shower and patrol with their dog by their side. This special bond is critical in forming a relationship of trust where each understands and reads each other's cues. One trainer remarked, "These soldiers don't have battle buddies to the right and left of them like a regular line soldier. Their only battle buddy really is that dog. They literally place their lives in the nose of that dog." Canine Soldiers is the first war documentary told from the point of view of a soldier/dog team, molding together their poignant stories with reflections from notable animal scholars who think outside the box about the significance of co-species evolution. Relying on dogs to keep us safe in war is only the continuation of a long history of co-evolution with canines. Even in this age of advanced technology, we are again relying on a "primitive" animal's superior sense of smell to survive. Does being dependent on another species to keep us safe during war open our hearts to new truths about ourselves, our connection to nature and ultimately to what it means to be human? The film also raises the ethical question: Is coopting a sentient being in conflicts that involve violence ever justifiable?

To The Edge Of The Sky

To The Edge of the Sky captures the evolution of four mothers from caregivers for their terminally ill children

How far would a mother go to save her child? To the Edge of the Sky is about four moms whose sons are diagnosed with the degenerative Duchenne Muscular Dystrophy, a fatal disease that's the No. 1 genetic killer of boys, as they fight the FDA to gain access to a potentially life-saving drug. Victims are not expected to live beyond their 20s. The film intimately records the transformation of these four mothers into the country's leading political activists pushing the government to allow access to a drug that might help save their sons' lives. The film captures how citizen activists can impact government; the "Right to Try" Bill just passed in the Senate largely due to the political moxie of the four women featured in To the Edge of the Sky. The "Right to Try" Bill allows terminally ill patients to have the right to try medicines after the medication has gone through only Phase One of the FDA process but is not yet fully approved. The law has been signed in 37 states. To The Edge of the Sky captures the evolution of four mothers from caregivers for their terminally ill children, with all of the ensuing stress and strain on their personal relationships, to ardent political activists, learning how to navigate government agencies and company boardrooms to reach their goal.

When Does a Band become a Brand?

“When the new millennium began with record companies suing their own customers for peer-to-peer downloading, the graffiti was on the wall. Like the industrial revolution before, the digital age wiped out the multi-billion dollar record business we once thought recession proof and timeless. “But the music didn’t die, it simply morphed into another dimension as the infrastructure built to filter, foster, package, market and sell it disappeared. Now music exists in an unfiltered internet ocean requiring navigational tools like Spotify and Pandora. And the vestiges of past record companies, co-opted into entertainment conglomerates, now create brands instead of artists, with commercials, soundtracks, and albums produced, not for the music, but to sell the brand.”

Parkland: Inside Building 12

On February 14th, 2018--a high school in Florida faced the ultimate test in humanity.

Acclaimed director Charlie Minn brings attention to the victims of the infamous massacre that occurred on February 14th, 2018 at Marjory Stoneman Douglas High School. A normal day at school became a true nightmare for Parkland, Florida citizens as they experienced something they had never thought would happen in their small suburb. In just six minutes, seventeen students and staff were fatally shot and seventeen more were wounded, while innumerable lives were changed forever. The true heroes of that day have come together to tell their stories and to bring words to those who are no longer here to offer them. This documentary reveals testimony and the raw emotions of those involved, highlighting the actions taken by individuals to save the lives of others through selfless and brave acts.
