Oaks: Acai Berry Diet EXPOSED
WARNING: Health Reporter Investigates and Uncovers the Shocking Truth!

In 1968, George Romero traumatized a whole generation and influenced film-makers worldwide with the legendary and revolutionary film "Night of The Living Dead." Many felt that this landmark epic motion picture marked the birth of modern horror movies. It was followed by the classic "Dawn of The Dead" ten years later, and then "Day of The Dead" in 1985. The Romero trilogy spawned endless zombie films, some good and some bad.

Equipped with camera, Nicolas Garreau crossed the Atlantic Ocean from France to realize his dream. Roaming the steep roads and countryside of Pennsylvania locales, he found not only the sites but the people who helped make the trilogy come alive.

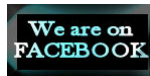

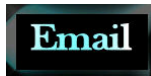

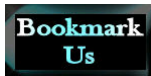

The new DVD, "Fan of The Dead," contains exclusive interviews with cast and crew members, while also revealing all the filming locales not previously known to the public, like the missile-launch-pad in "Day of The Dead" and the real basement used in "Night of The Living Dead," a guided tour of the mall, plus so much more.

Website: www.CheesyFlicks.com

The DVD runs about one hour, with extras and bonus footage. It's a must for any George Romero fan.

Horror Happenings loves writing about [Zombies](#) as much as the [films](#) that sometimes have zombies in them!

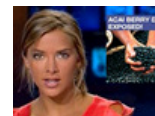

If you know someone who loves Monsters, Horror, Vampires and anything related to the genres, turn them on to Horror Happenings. [Subscribe here](#) - it's free and they will only receive emails when we publish a new Horror Happening (we will not sell or give out email addresses).
