IRON MAIDEN/Live After Death DVD (Columbia Music) I have always loved this bands old stuff and I have this release on CD and now after watching this incredible DVD if you even consider yourself a fan of the band, RUN and BUY this right now. This is an incredible release as you get the bands set list from CA, but that is only disc one. On disc # 2 you get a documentary on the making of this puppy and then you get another documentary and then you get 50 minutes from the Rock In Rio release, which totally of course kills. Aces High, Two Minutes To Midnight, The Trooper, Running Free, etc, now with a set list like that how can you go wrong. Iron Maiden were in my eyes at their peak during this era and if you missed them or just want to hear what the fuss was about, do yourself a HUGE favor and go out and get this. This is pure heavy metal and Maiden were they to lead the charge in the 80's and god what a fuckin set list on this, not a bad song in the bunch. Info:
