‘The Story of the Yardbirds’

This riveting documentary covers one of the super groups of rock ‘n’ roll. From 1963 to 1968, The Yardbirds were an innovative and compelling creative force. Featuring such guitar legends as Jimmy Page, Jeff Beck, and Eric Clapton, the film includes rare concert footage, archival and recent band interviews with tons of their original tunes examined and presented. Without a doubt, it was a band that would help determine the “shape of things”. (MVD)
