Nothing compares to seeing these colorful guys live, not even this DVD of them performing live. But, if you haven't been to one of their shows then this is the second best thing.

Punk rock has always been drawn to the anti sides of most everything: religion, politics, etc. Well, Anti-Flag is the epitome of anti-political punk rock, just look at their name!

This DVD includes fan favorites such as "Turncoat", "You Can Kill the Protester, But You Can't Kill the Protest", "Power To the Peaceful" and MORE!

Extra features on this disc are previously unreleased videos for "Death of a Nation" and "Post-War Breakout" as well as band interviews, live radio show appearances and some great montages.
