## Aggronautix Launches a Line Of Punk Rock Bobbleheads

Friday May 15, 2009

In the world of punk music, there are some characters that are larger than life, so much so that it's not surprising when a toy company decides to immortalize them in figure form.

This is the case with the company Aggronautix, which has just announced their line of "Throbbleheads," immortalizing punk's more colorful personalities.

The honor of being first two to be immortalized in limited-edition plastic production goes to [legendary Detroit punk](#) Tesco Vee of the Meatmen, and the even more legendary/frightening GG Allen. They can be ordered [here](#).

With GG or Tesco on your desk or in your car, you're definitely making a statement. What that statement is, I'm not exactly sure.

In addition, Aggronautix is currently working on a two-headed "throbbles" for the Dwarves, which will be released this summer.

Really, GG, Tesco and the Dwarves are just drops in the bucket as far as punk rock action figures can go. Who would you like to see recreated in action figure or bobblehead form? Would you like a [Fat Mike](#) on your dash, nodding along to the music? What about [Iggy Pop](#), bobbing his head in approval as you're plugging information into a computer at work? It would add a definite bit of punk cred to crunching numbers.
