

AGGRONAUTIX MINIATURIZES MAYHEM

BY RYAN J. PRADO

Connoisseurs of punk rock bobbleheads have a new altar at which to worship. And who better to bow down to than a self-professed messiah and a Dutch Hercules?

Aggronautix is ushering in a revolution of "Throbbleheads"—so named, says Clint Weiler, "because these little fuckers are a throbbing piece of plastic punk rock energy!"—with two controversial muses for their inaugural products: underground icons GG Allin and The Meatmen's Tesco Vee.

"I wanted to do something that was more underground, dirty, and hardcore," says Weiler, the man behind each Throbblehead concept. "It doesn't get more hardcore than GG."

In the next few months, Aggronautix will veer farther off the beaten path, with a double Throbblehead, featuring Dwarves' Blag the Ripper and HeWhoCannotBeNamed.

But when it comes to making toys with over-sized heads, can you really top a blood-splattered, crust-punk icon?
