

Treats From The Underground

KULT OV AZAZEL is a band that has been in the scene for a while & most of you dark hordes out there should know of these guys. They have been spewing forth their blasphemous Black Metal for years. The music is done in an old school Black Metal style with satanic sickness. Their sound is raw, harsh & dark all through out. There is a strong war like vibe that blankets their style which is the fight against Christianity. Coldness is felt in the harsh groggy Black Metal growls & screams. This is the best release from the legendary Black Metal band so far & one of the best bands to emerge from the darkest pits of Florida. Join the **KULT!** Hail Satan!
