VIOLET HALO/Flora Meets Fauna (Arctic Music) The tunes on this didn't do a thing for me and the music was also pretty flat. The singer had an OK voice, nothing earth shattering. The band play music in the vein of say some of the newer Entombed stuff, but minus the death metal. The riffs just win me over and I was pretty much bored by track 3. The production is good and the band is heavy, but the songs lack that killer riff or hook to make me a fan. Info:
