THROW RAG – ‘2ND PLACE’ CD

A new THROW RAG record is sure something to get excited about...there's no-one quite like these fuck ups that's for sure and you gotta see them live to get blown away. They're great on record but they absolutely kill live. '2nd Place' presents more of their unique blend of gritty, sleazy punk/folk/rock n' roll with some real style. If you're bored of punk rock that just coloring by numbers then TRHOW RAG is definitely a band you should check out...they have such a inimitable direction that appears to be no direction at all – in a fantastic way. They're like a bunch of sailors who know their destination but are working with a broken compass...but somehow, in some fucked up way they get there. Along with the 12 brand new cuts on here – including covers of the GEARS and LINK WRAY there are also 3 live cuts...this is a rock solid record from a band that blew me away when I first heard them a bunch of years back and have been addicted to since but I gotta stress- go and see them live if you get the chance, they rip.
