The Podcast Annual 2007

MIXED BY GARETH EMERY

'Podcast Annual 2007'

(BAROQUE)

An absolute monster from Gareth Emery here and yet more evidence of his growing stature behind the decks. This is full-on, adrenaline-fuelled underground dance music at its most exciting and Emery doesn't half possess an understanding of what 'peak-time' really means. Disc 1 is marginally more understated with fat techno grooves from Hogendoorn & Eelke Kleijn, Noel Sanger and Raw Shape mixing into Emery's own wonky cracker 'More Than Anything', but Disc 2 is where it really blows up: Alex MORPH, Activa and DNS provide the thudding tech ammunition before soaring trance melodies from Lange, Ferry Corsten and Stoneface & Terminal wrap it all with epic, hands-in-the-air hardness. Ridiculously euphoric stuff. **M7/M8**
