- 10 **Some Blue Sky**

Catalogue #: **BATTLE032**  
Release date: **7<sup>th</sup> October 2014**

Let's hear it for misery.... Co-Pilgrim return with album 3<sup>rd</sup> album.

Swaying Wires is an alternative folk/rock band based in Turku, Finland.

What began as a one woman project by Tina Kärkinen in 2008 developed into a full band in 2010, with members Sami

Lehtonen and Nicklas Hägen.

After a playing as a trio for a while, performing around Turku, the band finally found a drummer in Timo Harju. The newly formed quartet subsequently started recording some demo songs that would later form the nucleus of their debut album. Harju left the band shortly after the recording of these demos to pursue other interests. He was replaced by Jussi Virkkumaa, who had previously played in another band together with Sami.

In the summer of 2012 Swaying Wires started recording what would become their first full-length album, 'Some Blue Sky'. The album is a collection of songs written between 2008 to 2013 and was recorded in the band's rehearsal space.

March 2014 will see the culmination of this work when the band releases their debut, 'Some Blue Sky', through Battle Worldwide Recordings.

## PRESS

Quality songcraft, dusky textures, cutting melodies and deeply felt emotion / Q

The ten songs grow and fall away spinning and circling you; it is a gentle hurricane of sound. Just wonderful / Louder Than War

With such a strong voice and universal sound (if you were told the band were English or American you'd have no reason to think otherwise) this cracking batch of tunes have the potential to generate widespread interest / SoundsXP
