## Horror Comes Home - Tuesday, September 22nd

As always, I am only going to be discussing the DVD releases from this week that I personally have interest in or have something to say about. If you want to see every single horror DVD that came out this week, [Amazon](#) is the best place for that. Speaking of which, click any of the title links to be taken to the Amazon pages for each release, where you can learn more about them, read customer reviews, or pick up copies of your own!
