

THE FALL - RE-MIT OUT NOW

There are only a scant amount of bands who can boast a career spanning more than three decades and fewer that can honestly make those boasts while knowing they have made no compromises. Mark E. Smith has been giving us his bluster since the early 80's and, although the faces surrounding him have changed, he stubbornly refuses to bow out gracefully. On The Fall's 30th album, he reveals that he still has his chops as well, preaching his missives and pointing fingers without pause. The backing band are just as confrontational, so prep yourself before listening.
