Kyoto Protocol Comes into Force (2005)

The 1992 Earth Summit held in Rio de Janeiro, Brazil, produced a treaty aimed at reducing greenhouse gas emissions in order to combat global warming, but it failed to establish mandatory limits or enforcement provisions. The Kyoto Protocol is an amendment to the agreement that establishes such limits. Countries that ratify the treaty promise to reduce their emission of carbon dioxide and five other greenhouse gases or engage in emissions trading. Which countries have not ratified the agreement? [More...](#)

Meerkat Mobs

Meerkats are members of the mongoose family that inhabit the Kalahari Desert in Botswana and South Africa. They are highly social creatures and live in groups called "mobs," "gangs," or "clans," which have a dominant breeding pair and up to 23 helpers to assist with rearing the young. Mob members regularly groom each other, and some even babysit or stand guard while others forage for food. Meerkats are the first non-human mammal species to be observed doing what? [More...](#)

Kim Jong-Il (1941)

Despite rumors that he masterminded several terrorist bombings in the 1970s and 80s, Kim Jong-Il succeeded his father as ruler of North Korea in 1994. Although Kim took steps to improve international relations early in his rule, the country's continued pursuit of nuclear weapons technology soured its dealings with the West. Kim has a reputation for personal extravagance. What are some examples that have been cited as evidence of his excesses? [More...](#)

Satellite Space Crash Creates Dangerous Debris

The collision of a US and a Russian [satellite](#) over [Siberia](#) last Tuesday was the first high-speed impact between two intact spacecraft, but experts say more crashes are inevitable. The clouds of debris created by the accidental collision could remain in orbit for up to 10,000 years and pose a serious threat to numerous other [satellites](#). In 2007, China was widely criticized for destroying one of its own defunct satellites with a [missile](#), creating thousands of pieces of [space debris](#). Experts hope that this latest event will prompt lawmakers to address the issue of debris in space. [More ...](#)

Eerie Von - Bad Dream No. 13

Posted by: MXV

Under: [Reviews](#)

2 Feb 2009

Eerie Von - Bad Dream N0. 13 CD

[Ghastly Records](#)

For those of you who may not know who Eerie Von is I will explain. Eerie Von was the drummer for a relatively obscure New Jersey hardcore band called Rosemary's Babies and was also a huge Misfits fan and friend to Glenn Danzig. When Glenn disbanded The Misfits and started Samhain he enlisted Eerie to play bass for them. When Glenn disbanded Samhain to move onto the greener pastures of a major label under the moniker Danzig, Eerie

Von was the only Samhain member to come along for the ride. Eventually Eerie parted ways with Danzig and has released a couple of solo records, this being his second one (the first being one he did with Mike Morrance).

Bad Dream No. 13 is a huge departure from the demented orchestra music Eerie and Mike Morrance created for his first CD. The music on this album wasn't like anything I expected, it sounds a lot like some sort of music you'd hear at some broken down biker bar in the deep south. Though no computers were used, a couple tracks have a sort of industrial skeleton to them of the repetition and sound but sans the samples and keyboard noodling. The vocals are very deep and sound like a cross between Johnny Cash and Ian Curtis and overall the songs are sort of bluesy and part country in many songs. Not many of the songs sound the same on here but they all have a similar mood to them which is sort of somber and quiet.

The use of guitars is fairly minimal and the bass seems to be the most commonly used instrument (along with the drums). There aren't loud distorted power chords of any kind, instead the music sounds very "mature" and is much more passive than confrontational. Fans of Eerie Von's previous bands may not find what they are looking for with this CD but for those with an open mind looking for something completely different from the norm may find some worthwhile listening with this CD.
