Fish has put out tons of live albums since he left **Marillion**, and I can only guess that his motivation is mercantile in good part. Still some of these recordings are quite interesting, while others could easily have been omitted. Gladly, I consider *Communion* to be in the first category.

On *Communion* **Fish** revisits much of his song based mellower material, in an unplugged fashion. The usage of acoustic instruments gives these songs a folk mood that often, in my opinion, is more suited to them than the more electronic treatment they got on the studio albums. Also a couple of old **Marillion** songs can be rediscovered in a very different and interesting light.

Fish' voice is not quite what it once was (age and hard living I can guess), but in this format he does not need to push it as much, and he is well supported by a group of excellent backing vocalist.

All in all I consider *Communion* to be a nice complement to any **Fish** fan's CD collection. It is also a good place to rediscover the guy if you have not been following him of late.
