

Rock N Roll Experience - Nov/Dec 2005

QUEEN Under Review 1973 - 1980 DVD

Track Listing:

Rating: 4 Stars!

If you like the band Queen, then this is an interesting DVD for you, because it features a load of obscure concert footage & videos, & there's even an old interview with Freddie Mercury, as well as friends, journalists, etc., but I wanna point out one fact...the British guys have really bad teeth & if you remember what Austin Power's teeth looked like, then you might get a laugh...also, the bloke that was playing guitar in the interview clips was a little annoying at times! The moment that I found the most interesting was an interview with Freddie Mercury where he was talking about punk music & how he asked Johnny Rotten & Syd Viscous to sing on the new Queen record & he would return the favor, & how they rejected it & Freddie went on to make fun of Syd to his face & he had no clue how to react...that is rock n roll now! There's also a cool bonus section that lists all of Queens official releases & bootlegs, & another moment I found interesting was seeing Brian May with short hair...his helmet hair has become his trademark & I'd never seen him without it! When you watch this DVD you realize just how great Queen were, & how short their career was...it truly is sad that we lost Freddie like we did. If you'd like to get a copy of this DVD, you can get it at <http://www.mvdb2b.com>
