One of the founding members of Pink Floyd, Syd Barrett wrote many of the band's freaky, early albums, like [The Piper at the Gates of Dawn](#) (1967) and the tracks on [Relics](#) (1971). He's often referred to when people discuss mad artistic geniuses. But this BBC documentary is packaged and presented using the tired, standard-issue format with talking heads (mostly rock journalists), clips and narration -- hardly a proper format to discuss someone of Barrett's stature. However, this should tide over fans until something better comes along.
