

THE BEAT

DVD: Syd Barrett: Under Review (MVD):

and speaking of the Floyd, long before they hit it hugest with "Dark Side" they were founded and fronted by genius/schizoid Syd Barrett, who last only one LP with them (their best), barely made it thru a couple of his own, and faded into exile. This is his story, more or less, mostly told by 'talking heads' who knew him or became obsessed with him, with some vintage groovy footage. For confirmed fans.
