Whenever a release bares the words ‘the opinions on this DVD are completely independent. This DVD is not authorized by (said band), any of it’s members past or present, (said band’s) Management, (said band’s label) or any other companies associated with the release or ownership of (said band’s) music” you know what you’re viewing is to be taken with a pinch of salt. Taking in possibly one of Queen’s dullest periods, this DVD is informative, opinionated and intriguing to a point, but what with the band members releasing anything they’ve got left in the vaults at an astonishing rate it seems a little pointless to go into this point of their career without the people who were there’s thoughts. One for completists only!

By **Jeremy Chick**, Editor In Chief
