HOUSE OF LOVE BACK TO SHE PAINTS THE WORD IN RED

SHOOK DOWN 15/03/2013

Countdown also for **The House Of Love** , with the announcement official since the March 25 will be released in its first eight years unpublished. The project reunites its two main patterns, **Guy Chadwick** and **Terry Bickers** . By Art Vandelay

The next March 25 will be released on the new **The House Of Love**, first published after eight years of silence

The disc will have Guy Chadwick and Terry Bickers , rediscovered in 2003, when they released **Days Run Away**

Another project that will be released soon will be to **The House Of Love** , edited training next March 25 his new job, **She Paints The Words In Red** . This is the first publication of **The House Of Love** in eight years, which marks the return of veteran training to the forefront of today. The band was one of the formations largest port in the British indie rock of the 80s, and his return has confirmed the presence of the same original tandem, vocalist and composer **Guy Chadwick** and guitarist **Terry Bickers** . Bickers output at the time ended the high expectations that the band had generated in the Anglo market, announcing a first solution in 1993, after the band's latest work pasasen without undue significance between criticism.

The basis of the return began to carve in 2005, when **Chadwick** and **Bickers** staged their publishing **RECONCILIATION Days Run Away** , recovering some of the lost popularity with intense promotional tour, which rescued **Bickers** of forgetting who was immersed in, working as a janitor .

Guy Chadwick and Terry Bickers are then back at least as far as one can sense in the first deliveries made. Next week we will have made the first official single from the album, with *A baby got back on its feet* , while the previous advances come before with *Eye Dream* , available tum streaming.

March 29, 2013

The news confirms everything pointed the month of December, when the band announced their return to present the album that he would continue to **Days Run Away**, work published in 2005. Even then the veteran training confirmed that the same output would occur in the spring, a return now confirmed the hand of **Cherry Red Records**, the same label that last year the recovered disc debut album, in a more extended version that recommended.

Finally leave the (leading) album cover more reason to activate the countdown.
