

Ray Price - *Live at the Renaissance Center*
(DVD, [Music Video Distributors](#))

As of this date, this is the only full-length concert by **Ray Price** to be made available to the public. Taped in the late 1980s but never-before-seen until now, this concert presents the "**Perry Como** of country music" at a later stage in his career. Nowadays a smooth crooner like Price would probably be overlooked, but when this man's songs rocked the charts decades ago people were truly moved by his soft and subdued demeanor. Ray and his band present twelve tunes, all of which go over exceedingly well with the audience. It is a shame that many of country music's greatest artists of the past seem to be getting lost in peoples' memory banks. Thankfully, the *Live at the Renaissance Center* DVD series is shining a light on some of the greatest of the greats...which will hopefully turn younger artists and fans onto the music that has so obviously influenced them. Includes "San Antonio Rose," "Heartaches By The Number," "Help Me Make It Through The Night," and "For The Good Times." (Rating: 4+++)
